

WILLIAM XIE

DATA ANALYTICS & AI LEADER

Sydney, Australia | [PHONE] | [EMAIL] | [linkedin.com/in/williamzmx](https://www.linkedin.com/in/williamzmx)

EXECUTIVE PROFILE

Commercially focused analytics and AI leader with 6+ years of consistently achieving performance objectives and a record of translating ambiguous business questions into decision-ready insights, scalable reporting, automation and machine-learning solutions. Combines hands-on SQL, Python, Power BI/Tableau and Azure delivery with stakeholder confidence across Finance, Category, Marketing, Sales, IT and Operations. Led pricing and competitive-intelligence initiatives that increased profit by 3%+ across a \$500M+ portfolio, reduced workload by more than 50% through automation, and helped deliver 20+ cross-functional projects.

Finance & commercial analytics • Executive reporting & data storytelling • AI use-case discovery • Data quality & governance • Pricing & profitability • Dashboard product design • Stakeholder consulting • Process automation • Forecasting & machine learning • Team leadership & mentoring

PROFESSIONAL EXPERIENCE

[CURRENT EMPLOYER] | [CURRENT TITLE - Analytics / Pricing / AI]

Sydney, Australia | [MM/YYYY - Present]

- Led a cross-functional price-change program using elasticity modelling, competitive-pricing evidence, customer feedback and structured testing; increased profit by 3%+ across a portfolio exceeding AUD \$500M annually.
- Translated commercial and finance questions into reusable analytics assets, including product clustering, a centralised pricing reference, price-evaluation models and web-scraped market intelligence.
- Designed cloud-based automation and data workflows using Azure Databricks, Data Factory, DevOps, Blob Storage, Python, PySpark, SQL and REST/SOAP APIs, reducing manual effort and improving process reliability.
- Partnered with Finance, Category, Marketing, Sales, IT and Operations to define problems, test recommendations, improve pricing logic and customer experience, and move strategic initiatives into delivery.
- Shaped applied AI opportunities including Azure ML-based dynamic pricing and a real-time recommender system for cross-sell and up-sell use cases; managed SQL Server Agent jobs and BAU data controls.
- Supported ERP adoption, app logic and UX improvements through testing, documentation, knowledge sharing and structured stakeholder feedback.

[PREVIOUS EMPLOYER] | [PREVIOUS TITLE - Data Analyst / Data Scientist]

[LOCATION] | [MM/YYYY - MM/YYYY]

- Built and maintained 100+ external and internal reports and decision products using Power BI, Tableau and statistical analysis, earning positive stakeholder feedback.
- Created and managed SQL Server and PostgreSQL databases, data pipelines and migrations; used SSIS, Python and web-crawling methods to deliver reliable reporting data.
- Developed CNN, NLP/sentiment, forecasting and LSTM models to improve design relevance, marketing content, customer understanding, market-inventory estimates and commodity-price forecasts.
- Automated recurring ETL, reporting, website, invoicing, accounts-receivable and customer-engagement processes using Python, Google Apps Script, APIs and virtual machines, saving more than 50% of required workload in selected processes.

[PREVIOUS EMPLOYER] | CONTINUED

- Managed 550+ email and digital campaigns, using segmentation, A/B testing, send-time optimisation and content analysis to achieve open and click rates more than 100% above industry benchmarks.
- Led and supported cross-functional delivery, trained junior analysts, presented evidence to executives and customers, and contributed to winning a major European buyer opportunity through forecasting and interactive Power BI storytelling.

SELECTED ANALYTICS & AI PORTFOLIO

Pricing, profitability and competitive intelligence: Designed elasticity and price-evaluation models, a product-clustering capability and large-scale web scraping to identify under- and over-priced products, support tender selection and improve portfolio profitability.

AI-enabled customer and product decisions: Built computer-vision models for design preference, NLP/sentiment models for customer interest, forecasting models for cashflow and commodities, and recommender concepts for cross-sell and up-sell opportunities.

Scalable reporting and decision products: Developed and maintained Power BI/Tableau reporting products, geospatial views, market-inventory forecasts and executive narratives that translated complex evidence into clear actions.

Automation and data assets: Created repeatable ETL and API workflows across Azure and SQL platforms, improved data synchronisation and BAU processing, and reduced manual effort, error risk and delivery time.

LEADERSHIP & STAKEHOLDER VALUE

- Consultative problem solving: converts broad stakeholder questions into clear problem statements, practical analysis and evidence-linked recommendations.
- Executive communication: communicates technical findings to Finance, company boards, operational leaders, customers and non-technical stakeholders through concise reports, dashboards and presentations.
- Delivery leadership: contributed as a lead or principal contributor across 20+ projects, supported team development and maintained a consistent record of achieving KPIs and agreed deliverables.
- Commercial curiosity: connects customer, product, channel, pricing and operational data to revenue, profit, engagement and efficiency outcomes.

TECHNOLOGY

Analytics & AI: Python, R, PySpark, scikit-learn, TensorFlow, Azure ML Studio, forecasting, NLP, computer vision, recommender systems, A/B testing

Data & cloud: T-SQL, PostgreSQL, P/SQL, SQL Server Agent, SSIS, Azure Databricks, Data Factory, Blob Storage, Azure DevOps, Apache Spark, REST/SOAP APIs, Amazon EC2/S3

Reporting & visualisation: Power BI, Tableau, matplotlib, folium, geospatial analysis, executive insight packs, dashboard design and data storytelling

EDUCATION & CREDENTIALS

[DEGREE / QUALIFICATION] | [INSTITUTION] | [YEAR]

[RELEVANT CERTIFICATIONS, PROFESSIONAL DEVELOPMENT OR BANKING / AI GOVERNANCE TRAINING]

ADDITIONAL ACHIEVEMENT

Earlier sales experience included breaking a company sales record and leading a high-performing sales team, strengthening William's customer focus, commercial judgement and confidence in stakeholder-facing environments.
